

MS STUCO ROLE:

As students of AISB take the role of STUCO, they take on STUCO's prime role which is to unify our secondary school community. We plan to fulfil this role by assembling many activities throughout the year which will require students to work with other pairs from different grades. So far, STUCO have assembled a weekly activity which demands from students both physical and verbal skills in order to complete the task in hand. Students are also encouraged to work cooperatively with other secondary students while participating in the assembled activity. As the year will continue, STUCO members will work as hard as they can in order to complete their role.

MS STUCO goals:

As the face of middle school AISB students, we have set a Varsity of goals which we intend to complete by the end of 2017-2018 school year. Our main goal is to improve school conditions and enforce the safe/enjoyable environment that the students of AISB experience. We plan to fulfil this goal by interacting with students throughout middle school and recognize the changes they will wish to see in our community. We also plan to involve students in a Varsity of activities throughout this year which will create an interaction between upper and lower middle school.

Collaboration groups:

We have collaborated with a Varsity of groups around the school in order to unite student leadership groups and develop student empowerment at AISB. Since the beginning of the school year, STUCO have collaborated with a few student leadership groups. We have worked with MAD members (making a difference) in order to advertise their actions and encourage middle school students to participate in their activities. We also worked with high school STUCO in order to decorate the secondary building in greeting of Christmas time. We have also worked with secondary teachers and developed ongoing activities that help STUCO raise money for a Varsity of nutritious fruit available for students of AISB. As the year continues, we plan to collaborate with more groups and continue uniting student leadership groups.
